

Integrated Design Planning and Control: using the 'ADePT' technique

Understand the principles and implementation of the ADePT planning and control technique with five custom-designed training courses.

Training Courses

1. Introducing ADePT: Integrated Design Planning, Management & Control	Format	Delegates	Location
	One-hour in-house seminar	Up to 40	Your office or preferred training centre.
<p>This free one-hour seminar will describe the problems associated with the planning, management and control of iterative design processes, before describing methods and tools for overcoming them.</p> <p>This seminar is accredited by RIBA as part of their Continuing Professional Development (CPD) core curriculum. The seminar falls under the heading of 'Managing Projects' and covers the subject areas of: (i) Quality Management systems; (ii) time and resource management; and (iii) Project Management.</p> <div style="display: flex; justify-content: flex-end; align-items: center; gap: 20px;">   </div>			
2. Design Planning: Creating an Integrated Design Programme	Format	Delegates	Location
	One-day in-house workshop	Up to 30	Your office or preferred training centre.
<p>In recognition of the need to plan, manage and control the design process in an integrated fashion this one-day workshop, encompassing both taught and practical sessions, provides training in methods & techniques for developing integrated design programmes through structured, collaborative working.</p> <p>This course is accredited by RIBA as part of their Continuing Professional Development (CPD) core curriculum. The course falls under the heading of 'Managing Projects' and covers the subject areas of: (i) Quality Management systems; (ii) time and resource management; and (iii) Project Management.</p> <div style="display: flex; justify-content: flex-end; align-items: center; gap: 20px;">   </div>			

3. Tools for Developing an Integrated Design Programme	Format	Delegates	Location
	Half-day hands-on course	Up to 6	AML's training centre in Coventry

This course will provide a brief reminder of the principles of the ADePT technique and give delegates hands-on experience of all aspects of the *ADePT Design Builder* software, thus enabling them to develop integrated design programmes. The course is available to those who have purchased the *ADePT Design Builder* software and have attended a previous course covering the principles of ADePT.

4. Integrated Design Programmes: Principles and Implementation Tools	Format	Delegates	Location
	One-day hands-on course	Up to 6	AML's training centre in Coventry

This course will combine aspects of course 2 and course 3, for those that wish to gain hands-on experience of all aspects of the *ADePT Design Builder* software, but have not previously attended a course on the principles of the ADePT methodology. The course is available to those who have purchased the *ADePT Design Builder* software.

5. Tools for Managing and Controlling Design Projects	Format	Delegates	Location
	Half-day hands-on course	Up to 8	Your project office or AML's training centre in Coventry

This course will give a brief overview of the principles of the ADePT technique and give delegates hands-on experience of all aspects of the necessary aspects of the *ADePT Design Manager* software, thus enabling them to report against and control their project against an integrated design programme. The course is available to those who have purchased the *ADePT Design Manager* software.
