

To meet the ever increasing passenger and airlines capacity, strategic expansion and development is the fast changing face of the aviation industry. This paper is a summary of projects for which we have provided a variety of services in the strategic planning, design & procurement phases. Typically Adept Management services are:-

- **Design Management** - Provision of key resource to manage the complex early stages of projects, ensuring the input of the design team & all stakeholders is timely, co-ordinated & geared to the success of the project.
- **Integrated Design Programming** - Using our ADePT¹ approach to understand, optimize & plan the detailed work of all members of the health planning, design & procurement teams.
- **Stakeholder Management** - Planning & Management of stakeholder engagement & consultation processes.
- **Strategic Planning** - High Level, whole project planning & scheduling.
- **Design progress reporting & performance monitoring** - Using ADePT¹ & the Integrated Design Programmes to provide transparency in design team progress & objective performance monitoring of all parties.
